

Heat Exchanger

Kincaid Marine Rolco has introduced a new line of Heat Exchangers and kits. Using the latest copper and copper alloy technology Rolco now offers fully guaranteed compact units that are adaptable to a wide range of engines. Being of dual pass design increases efficiency. Even our smallest model is capable of cooling an engine of 400HP and our larger model up to 600HP ensuring efficient cooling even under the heaviest loads.

Features

- Ultimate salt water corrosion protection for your engine
- Heat transfer capacity of 400HP or 600HP
- Compact 100mm diameter body
- Copper & copper alloy construction with Anode Protection
- Multi pass design with large tubes
- Removable end caps for easy tube cleaning
- Black powder coat finish
- Easily adaptable to any marine engine
- Front mount small block Chev, Mercruiser and Indmar/Malibu kits available
